

Preparations for **Perimeter** treatments:

Lawns

- Remove all pet waste from the yard. Pet food, water bowls, and toys should be placed inside.
- Kid toys that are moveable should be placed inside.
- Cover barbeque grills. **Although all products that will be used are people and pet safe once dry, the yard is “off limits” during treatment. The yard is “off limits” for 2 hours after treatment.**

If the interior treatment is part of the “3 plus 1” program or is a first-time perimeter treatment, please follow these additional preparations.

Indoors

- Provide access to the plumbing areas underneath all kitchen and bathroom Sinks.
- Provide access to all windows.
- Provide as much access to the baseboards as possible.
- Move pet food and water bowls to an area that will not be treated. (We suggest on a table that is higher than ground level)

For one week to ten (10) days following the treatment you may notice an increase in pest activity. If this occurs do not be concerned. This is a result of the treatment driving the pests out of their nesting areas.
